connecting your life through technology

EMPOWERING BABY BOOMERS TO EMBRACE TECHNOLOGY AND NEVER STOP LEARNING!

Judi Jacobs, The Tech Wizard, provides one-on-one training and group technology classes tailored to those over 50.

As a former plaintiff's tort trial lawyer, Judi began her journey into technology in the early part of her legal career. Like many over 50, she did not grow up with a computer and was not a so-called "digital native." Through the necessities of life of her career and raising five children, she discovered a love of computers and mobile devices.

In 2005 she launched her IT business in conjunction with the practice of law. In August 2012, Judi decided to devote her efforts to her passion: teaching people how to use technology for life.

Judi fosters this passion through private and group lessons for Baby Boomers in her Los Angeles office, volunteer service at the Culver City Senior Center, and speaking at conferences, seminars and private offices.

Whether her clients need to use technology to stay relevant in the workplace, or want to use it to stay connected with friends and family, The Tech Wizard provides the support and expertise to help them feel confident in their tech skills.
